

Fetal Growth 2019

Berlin, Germany

9 - 11 October 2019

We are pleased to announce the 8th International Conference on Fetal Growth. The meeting is organised by the Perinatal Institute and an international scientific committee, in partnership with researchers from the Clara Angela Foundation and the Charité University, Berlin.

The conference will present evidence from latest research and clinical practice, and examine new guidelines for fetal growth surveillance and management.

MAIN THEMES

- Risk factors and prevention
- Growth velocity and adverse outcome
- Hypertension and fetal growth
- Fetal growth in twins: what's normal?
- Predicting macrosomia
- Management of early and late onset FGR
- New guidelines, protocols and algorithms
- Clinical case discussions: how to manage
