

National GAP User Symposium

Friday 7 July 2017, 9am – 4pm, Birmingham

Increased awareness and improved antenatal detection of pregnancies at risk due to fetal growth restriction have led to the recent year-on-year reduction in stillbirth rates to their lowest ever levels.

Over 80% of NHS Trusts and Health Boards already use the Growth Assessment Protocol or are in the process of implementing it. As the programme enters its 5th year, we would like to invite you to this special symposium with a multidisciplinary faculty of speakers. The aim is to take stock, celebrate progress, share best practice, recognise local achievements, and identify ongoing challenges and their solutions.

Who should attend?

GAP leads and midwives, obstetricians /MFMs, neonatologists, ultrasonographers and other professionals tasked with delivery of safe maternity services.

Guest Speakers

Dr Sanjeev Deshpande	consultant neonatologist, Shrewsbury and Telford NHS Trust
David Cole, Anushka Sumra	senior lecturers in ultrasonography, Birmingham City University
