

We are pleased to invite you to a special full day workshop for sonographers, in preparation for the introduction of Saving Babies' Lives Care Bundle v2 from April 2020.

This workshop follows on from a recent national survey which found significant shortfalls in training and workforce capacity needed to fulfil Saving Babies' Lives Care Bundle v2. It will include live demonstrations of the main Doppler flow parameters and standards for ultrasound biometry, and advice for further training. The new GAP algorithms will also be presented which can be used for phased implementation of the SBL CBv2 protocol according to readiness of the service.

**Preliminary program outline:**

- Report on Ultrasound and Doppler survey: results and implications
- Live Doppler flow demonstrations: Umbilical, Uterine and Middle Cerebral Artery
- Ultrasound biometry: improving accuracy and quality assurance
- Two stage GAP algorithm for phased implementation of CBv2 Element 2
- Q & A on evidence, training opportunities, how to address challenges

Detailed program to follow

**Who should attend?**

The workshop is primarily aimed at sonographers and clinicians (obstetricians/MFMs, midwives) who are tasked with providing and/or co-ordinating maternity ultrasound and Doppler services.

**Venue:** Perinatal Institute, Birmingham

**Time:** 09.00-16.00

**Registration** (including lunch and refreshments): £ 80

Places are limited and we recommend early booking to avoid disappointment.

To register, please complete the online form: [www.perinatal.org.uk/diary/masterclass.aspx](http://www.perinatal.org.uk/diary/masterclass.aspx)

For any queries, please contact the GAP Team on 0121 607 0101 or [gap@perinatal.org.uk](mailto:gap@perinatal.org.uk)
